

A photograph of a man with a beard and a white shirt adjusting a hearing aid on the ear of a smiling woman with dark hair. The woman is wearing a yellow top and a grey cardigan. The background is a bright, modern interior with large windows.

SIEMENS

www.siemens.com/hearing

Hearing instruments.

Partners for life.

Life sounds brilliant.

Hearing on your own terms.

No two people's hearing needs or wishes are the same. But there's one thing we all have in common: We're happy that the days of large, clumsy-looking beige hearing instruments are far behind us. Today's models are tiny, versatile, high-tech marvels – some are even rechargeable. And their sleek design is surprisingly stylish, so it's perfectly ok if someone catches a glimpse.

What's more, modern hearing instruments feature useful options for any lifestyle. So whether you're looking for a sporty solution or a classy conversation assistant, you're sure to find instruments that fit your needs. It's never been easier to jump back into life. Siemens offers a wide range of hearing solutions in Receiver-In-the-Canal, Behind-The-Ear and custom models – for every kind of wearing preference, almost any degree of hearing loss, and nearly any taste in style. And for even more convenience, there's a broad variety of accessories that keep you connected to your favorite electronic devices.

Your Hearing Care Professional will be glad to help you choose the solution that is best for you.

In the
driver's seat.

In meetings.

Solutions for
every listening
situation.

At the theater.

At home.

In the park.

In the pool.

Small and powerful: Meet our RICs.

■ Their size and design make Receiver-In-the-Canal hearing instruments an inconspicuous yet powerful solution, suited to almost everyone. Because the receiver sits directly in the ear canal, the housing is tiny and they can provide a high level of amplification. Above and beyond this, all Siemens RICs are IP67-rated which means they're resistant to moisture, sweat, dust and dirt.

Siemens RIC hearing instruments.

■ Stylish in design, yet discreet in appearance: Siemens tiny RIC models come in many classy colors.

■ Ace

Smaller. Simpler. Smarter.

Ace™ is Siemens tiniest, most discreet RIC solution. Its fully automatic functions, reliable functionality and natural sound quality make it the perfect choice for first-time users.

Available colors:

■ Pure

Consummate technology and design. Pure™ offers exceptional hearing quality in miniature. Fitted with the latest technology, it automatically adapts to the respective hearing situation, has personalized tinnitus functions and, when used with the corresponding accessories, is rechargeable and boasts wireless connectivity for a customized hearing experience based on your needs.

Available colors:

■ Orion

Comfort and reliability.

Robust and dependable, these hearing instruments offer long-lasting listening comfort with the added convenience of adjustments via remote control.

Available colors:

Enjoy comfort and versatility with our BTEs.

Whatever life has in store for you, our Behind-The-Ear instruments provide the perfect sound: Available with LifeTubes or earhooks, they sit comfortably behind the ear for an enhanced hearing experience. Most Siemens BTE models are equipped with a tinnitus noiser that can help relieve tinnitus while improving your hearing – to reduce strain and provide a more peaceful state of mind.

Actual sizes in cm

BTE details at a glance.

Directional microphones
Increase speech understanding by focusing on sounds coming from in front of you.

Slim neck design
Offers a comfortable, discreet fit behind the ear.

Dual onboard controls
Allow you to easily adjust the volume or program.

Charging contact
Rechargeable so you don't have any hassle with batteries.

Additional colors for some models:

Nitro

Flexible battery compartment

Super Power. Super connectivity. Nitro™ BTEs combine maximum amplification, wireless connectivity and a comfortable fit.

Available colors:

Flexible battery compartment:

Nitro and some Motion models come equipped with a child-lock battery door that keeps children from unintentionally opening the battery compartment. With a modification and an optional audio shoe these models easily connect to most common FM solutions.

Aquaris

Waterproof, dustproof, and shock-resistant. Sweat, dust, dirt and sand mean nothing to Aquaris™, the only waterproof, IP68-rated hearing instrument on the market. This solution lets you take life to the extreme.

Available colors:

Just a perfect match: Our custom instruments.

Custom models are tailor-made for your individual ear anatomy and hearing loss, offering a perfect fit and absolute discretion. There are three types, differing in size and placement within the ear canal.

In-The-Ear instruments are worn in the bowl of your ear, In-The-Canal models fit in the ear canal and Completely-In-the-Canal instruments are so tiny that they are practically invisible.

Accessories: For full control and connectivity.

Siemens' broad range of accessories allow for discretion and ease while at the same time highlighting convenience.

Audio streamers feed audio signals from various sound sources straight into your hearing instruments, remote controls allow for discreet program and volume adjustments, and rechargers avoid annoying trouble with tiny batteries.

So whatever your hobbies, whatever your passions, you can have your mind free to enjoy them.

Connectivity for ultimate convenience: Audio streamers.

The Tek™ and miniTek™ audio streamers and remote controls transmit sound from audio sources directly into your ears.

You can use the Tek and the miniTek to talk on your mobile phone, stream your favorite song or watch TV at your preferred volume without disturbing others by simply adjusting the volume on the audio streamers.

Plus: For even more discretion and convenience, miniTek can be controlled by Android* smartphones with the miniTek Remote App, available in the Google Play* Store.

Full control at your finger tips: Remote controls.

Easily and inconspicuously adjust your hearing program settings with our sleek and stylish ePen™, easyPocket™ and ProPocket™ remote controls.

Hassle-free and environmentally friendly: Rechargeability.

The eCharger recharges and dries hearing instruments overnight so you don't need to fiddle with small batteries.

eCharger

Finding the perfect model.

Because each person has different hearing preferences, there is no “one size fits all” answer to hearing loss; each solution is as unique as the individual.

But there are three main factors that influence anyone's choice: Ear anatomy, degree of hearing loss, and personal lifestyle.

Your Hearing Care Professional will be happy to help you find the solution that is best for you.

➔ **Stay tuned.** As you can see, Siemens offers a broad range of hearing instruments and accessories that meet the individual needs of anyone with hearing loss. If you would like further information, see our full catalogue or talk to your Hearing Care Professional.
