

Can you spot the dot?

... probably not

# The smallest thing can make the biggest difference

dot™ by ReSound is a smart, tiny hearing instrument.

It is so small, nobody else will notice you are wearing dot. It virtually disappears on the ear. dot's unique ergonomic design also makes it lightweight and comfortable to wear.

Only you will notice a difference with dot: better hearing and speech understanding. You'll wonder how something so small can make such a big difference.

# Sophisticated performance

dot by ReSound is very small, but it offers high tech performance to meet your individual needs.

## **Effortless**

Wearing dot is easy because it features automatic programming. It is at home in any environment, and requires no manual adjustments from you. dot adjusts to your preferences; you enjoy optimal hearing without having to do anything.

## **A clear benefit**

You have probably experienced difficulty hearing in restaurants, at parties or in other large group settings. Only dot offers personalized technology to deliver better hearing for you in the most difficult listening situations.

## **Whistle-free**

dot features Dual Stabilizer™ II, a feedback cancellation system, which effectively diminishes any whistling.

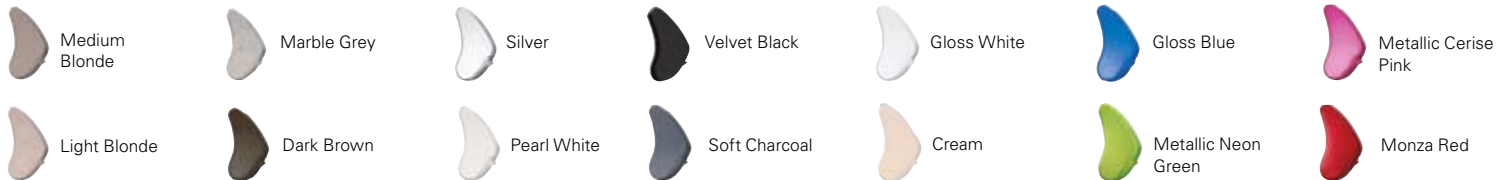

Choose the dot that suits you.

# Choosing dot by ReSound

dot by ReSound is flexible. If your hearing loss or listening needs change, your hearing healthcare professional can adjust dot easily.

You can also customize the outside case of your dot by choosing between 14 different colors. Ask your hearing healthcare professional to show you the full range of models.
